

QUALITY AND ENVIRONMENTAL POLICY

Our mission is

to be the preferential choice of our customers, employees and suppliers, contributing to sustained growth and to the satisfaction of our shareholders.

As such, we believe that Quality and the Environment are the essential guarantee for its concretization.

We recognize that in order to ensure the sustainability of future generations, we must develop our work to assess the risks involved in our activities and minimize their environmental impacts.

To this end, we publicly commit ourselves to comply with the following principles:

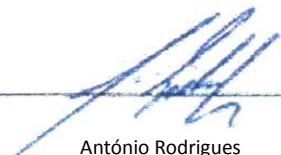

Consider environmental protection and pollution prevention, an important responsibility of the Direction, ensuring that it is carried out through the definition of objectives and targets for the entire organization;

Distinguish the excellence of the services provided, satisfying the requirements of our costumers and enhancing a continuous improvement of our results;

Ensure continuous improvement of the efficiency and effectiveness of our management system, providing us with the necessary resources and competences, with the ultimate goal of achieving "ZERO DEFECTS". This commitment of continuous improvement will result in increased satisfaction of our customers, employees and the community;

Ensure compliance with applicable legal, regulatory and contractual requirements;

Ensure the deployment of this policy to all its employees and stakeholders.
