

HightechWrap

HightechWrap is a project of manufacturing investment of new technologies and infrastructures to cover thermoplastics products with different foils like PVC's, TPO, Alcantara and fabrics in order to provide to the final product different characteristics on appearance, touch and perceived quality. Simoldes will add new technologies like In Mould Graining, Laminating by Vacuum Thermoforming and press covering laminated with hot melt adhesives. HightechWrap project will enable Simoldes Plásticos to offer to the Automotive market news products with more added value and product differentiation. The new plant will be located at Oliveira de Azeméis and will bring to the national market new technologies that does not exist in Portugal.

The project is supported by Compete 2020.

Project no. POCI-01-0249-FEDER-014366

Support under the Business **Innovation Incentive** Scheme

Project name: **High-Tech Production Line for Wrapping**

Total Eligible Cost: **EUR 9,003,249.00**

EU Financial Support: **EUR 4,051,462.05**

Project Location: **Oliveira de Azeméis**
